NETA Training Courses Help Electrical Power Systems Professionals and Technicians Continue Their Education and Prepare for Certifications

NETA's Self-Paced Technical Seminars, ANSI/NETA Acceptance Testing Courses, and Handbook series provide opportunities for CEUs, CTDs, and preparation for certification exams.

Portage, Michigan, March 30, 2017 – NETA — InterNational Electrical Testing Association offers an extensive selection of online training to help electrical power systems professionals not only continue their learning, but also meet the requirements for NETA certifications and other electrical industry certifications and credentials.

A commitment to continuing educational requirements is important because it helps ensure that electrical power systems industry professionals perform at their best throughout their careers. NETA's learning opportunities appeal to NETA Certified Technicians as well as electrical power systems professionals at large, because the training focuses on the core competencies of quality, safety, and reliability.

Order courses online here or call the NETA office 888-300-6382.

NETA training courses are also a great way to prepare for certification exams. Register for exams now. Testing begins April 3 and runs through April 29.

NETA offers many training resources to advance learning including on-demand courses that allow professionals to take the training with them where ever they go, take advantage of down time between jobs, and use courses for Lunch and Learns.

NETA's Training Library Includes:

- NETA Online ANSI/NETA ATS training:
 - Ground system acceptance testing
 - Cable system acceptance testing
 - Instrument transformer acceptance testing

- Self-Paced Technical Seminars
 - Primer on NFPA 70E
 - Battery systems
 - Circuit breakers

- Transformer testing
 - Motor control centers
 - Online diagnostics
 - Partial discharge
 - Stator windings
 - Cable testing
 - And more...
- NETA Handbooks Series I and II
 - A collection of articles and papers over the past 10 years, including topics such as arc-flash, insulating oils, online diagnostics, transformers, circuit breakers, IR scanning, grounding systems, maintenance, protective relay, safety, and more.

SAVE THE DATE: PowerTest 2018 Heads to Washington, D.C.

Join NETA and leading electrical power systems professionals at the premier industry conference on February 26 - March 2, 2018. Sponsorship and exhibitor opportunities are available for companies seeking leadership visibility at the event. NETA's industry partners are encouraged to reserve exhibit space and confirm sponsorships as soon as possible. Inquiries should be directed to Laura McDonald at 269-488-6382 or lmcdonald@netaworld.org.

ABOUT NETA

NETA is an ANSI Accredited Standards Developing Organization that creates and maintains standards for electrical maintenance and acceptance testing for electrical power equipment and systems, as well as a standard that addresses the certification of electrical testing technicians. NETA is an association of leading electrical testing companies comprised of visionaries committed to advancing the industry standards for power system installation and maintenance to ensure the highest level of reliability and safety.
