

WEIDMANN

In late October, Weidmann Electrical Technology will host their Annual Technical Conference for the first time in Minneapolis, Minnesota, USA

St. Johnsbury, Vermont (21st September 2018) – Including technical sessions, training and a vendor expo, Weidmann Electrical Technology will host its 2018 Annual Technical Conference in Minneapolis, Minnesota, USA.

A group of highly experienced and knowledgeable speakers have come together to deliver a program that will feature informative and current topics which showcase innovative and applied technologies. With topics including the areas of advancing transformer maintenance practices, new equipment materials for transformer and auxiliary equipment, and the diagnostic testing of transformers, circuit breakers, and load tap changers, the conference is designed to assist maintenance operators, engineers and management to maximise the life of electrical equipment in the field.

In addition to the conference program, there will be a visit and tour of the local Jordan Transformer facility. Jordan Transformer specializes in field service, rewinding, repairing, remanufacturing, and supplying oil filled Substation and Mobile transformers. They also manufacture entirely new Mobile Substations, handling transformers up to 200 MVA and 230 kV with Impulse testing and Partial Discharge monitoring.

The pre-conference session and the main conference will be held at The Hilton Minneapolis/St. Paul Airport – Mall of America. This event will include IEEE CEU and NETA CTD credits which are available to all attending the training and main conference sessions.
