

T-Doble: Circuit Breaker Software Update and Training Opportunities

Now Available: T-Doble 3.3

Intelligent software for circuit breaker test management

Please refer to detailed installation instructions and version details in the Release Note included in the download package.

T-Doble Software is designed to work with Doble's TDR instruments for test control, test plan preparation and analysis of test results.

T-Doble 3.3 features support for multi-unit (ganged) operation of up to three TDR9100 instruments, along with improved creation and presentation of exported test reports.

T-Doble includes integrated access to the dobleDATABASE online records management system. You can now move test plans and results to a dobleDATABASE and utilize DTAWeb without leaving the T-Doble application.

T-Doble 3.3 works with the TDR9100, TDR900 and TDR9000 instruments.

PLUS Two Upcoming Circuit Breaker Training Opportunities

Circuit Breaker Operation Analysis & Lubrication Tutorial at the Client Committee Meetings in Miami Florida*

At the Circuit Breaker Operation Analysis and Lubrication tutorial, presenters will not only cover the concept of breaker operation with respect to operational timing and travel, they also will describe the proper lubrication of the mechanical parts which typically contribute to abnormal opening and closing operation.

The tutorial will sum up the main topics by utilizing case studies from actual breakers and show the participants what is needed to successfully test and maintain their circuit breakers.

*All utility, testing and industrial companies who have a Services Agreement with Doble that includes Conference attendance are eligible to attend the Client Committee Meetings. That means there is no registration fee - it's one of the benefits of being a Doble Services Agreement Client.

Finepoint Circuit Breaker Test & Maintenance Training Conference hosted by Doble Engineering Company

The 20th annual Finepoint Conference delivers extensive hands-on training combining theory and practical information:

- Provides useful information that you can immediately apply to substation and switchgear maintenance from the industry's foremost experts including the Circuit Breaker Fundamentals
- Tutorial led by Jozef Levi from Doble Engineering Company
- Participate in interactive manufacturer tours from Southern States and Hitachi, HVB Inc.
- Safety is always a priority - get informed on the most up-to-date regulatory requirements
- Earn Continuing Education Units
