

## **Electro Rent Announces Opening of Houston Regional Service Center**

*--New Texas Hub Provides Fast Local Delivery;  
Immediate Availability of Most Popular Electrical, Power and Physical Test Products --*

**VAN NUYS, Calif. -December 8, 2014 -Electro Rent Corporation (Nasdaq: ELRC)**, one of the largest global electronic test equipment rental, leasing and sales organizations, today announced it has opened a new regional service center in Houston to better service local demand for test and measurement equipment.

The 6,000 square foot facility, located in the Southeast area of Houston, will allow for faster equipment delivery from a local hub within Texas, where the company has a large concentration of customers in the oil and gas and energy industries. By minimizing shipping costs, customers can better optimize operating efficiencies and competitiveness. The customer-centric service center includes a drop-off and pick-up facility for the most popular, fully calibrated electrical, power and physical test products offered by Electro Rent, along with onsite technical support, daily equipment rental options and a comfortable customer work and waiting area.

“Customers in Texas have been looking for a local test and measurement facility operated with the highest degree of professionalism, skill and proficiency. Our new Houston service center is perfect for customers who require swift access to equipment, often for short periods of time,” said Daniel Greenberg, Chairman and CEO of Electro Rent. “Electro Rent is proud to be providing these customers with quick access to the equipment they need most, exactly when they need it, while providing the best-in-class service and expertise for which we have become known throughout the industry.”

The facility is located at 4407 Halik Street, Building B, Suite 500, Pearland, Texas 77581.

### **About Electro Rent**

Electro Rent Corporation ([www.ElectroRent.com](http://www.ElectroRent.com)) is one of the largest global organizations devoted to the rental, leasing and sales of general purpose electronic test equipment, personal computers and servers.
