Early Bird Registration for NETA's PowerTest 2017 Conference is Open Now

Register Now for the Premier Electrical Maintenance and Safety Training Event — February 27-March 3, 2017.

Portage, Michigan, September 01, 2016 — NETA, the InterNational Electrical Testing Association, invites professionals involved in the electrical power systems industry to expand their knowledge and energize their future by joining us at PowerTest 2017, hosted at the Disneyland Hotel in Anaheim, California, on February 27 – March 3, 2017.

The industry's best and brightest will gather and connect with attendees to learn from each other's knowledge and experiences. The PowerTest 2017 technical agenda offers five days of high-powered learning and interactive sessions that facilitate the exchange of ideas, helping to shape the future of the electrical power systems industry by involving electrical testing technicians, engineers, and managers from a cross-section of all industries reliant upon large power generation and distribution facilities.

Electrical safety, protective relays, equipment and reliability, power transformers, battery systems, and vacuum circuit breakers will all be highlighted at PowerTest 2017. Attendees can take part in the discussion by participating in technical presentations, interactive panel sessions, and a symposium lead by a team of subject matter experts. The New Product Forum, many networking events, and in-depth seminars also offer educational venues that expand beyond the first two days of the conference.

The PowerTest Trade Show on Tuesday afternoon will feature over 100 top-tier vendors whose mission is to connect with PowerTest attendees and provide real-world solutions to everyday challenges.

Click here to view the full PowerTest 2017 schedule.

Early Bird Registration is Open Now!

PowerTest 2107 registration or a social pass is required to attend all conference events and networking activities. Additional fees may apply. Discounts are available for NETA Accredited Companies and NETA Alliance subscribers, and for attending multiple seminars.

To register for PowerTest 2017, visit <http://www.powertest.org>.

About NETA

NETA is an ANSI Accredited standards developing organization that creates and maintains standards on electrical testing for electrical power equipment and systems. NETA is an association of leading electrical testing companies comprised of visionaries committed to advancing the industry standards for power system installation and maintenance to ensure the highest level of reliability and safety. For more information, visit <http://www.netaworld.org>.
